The Minories Gallery and the University of Essex present:

Underground Maps Unravalled: Explorations in Information Design, by Maxwell Roberts

An exploration of the use of Henry Beck's basic design rules: replacing chaotic, twisting routes with simple straight lines; horizontal, vertical, or 45 degrees only. Is this always the best design method, or do today's complex transport networks demand fresh approaches?

September 3 to 24, 2010

Free entry

Maxwell Roberts is a lecturer in psychology at the University of Essex

The Minories Gallery, 74 High Street, Colchester, CO1 1UE
